

Marilyn Monroe Website
Art Director: Diana
Designer and Developer: Arianna

Initial HTML review:

- The information actually doesn't look too big, but I can also condense it if you think it is too much.
- As of now, the length looks very good
- The only thing that caught my is maybe we can alternate the left and right side with text and image because it seems a bit cluttered to the left.
- The beginning monogram is a bit blurry, but it could also just be my screen
- Overall it looks great and it is near completion
